WELCOME

Dear Friends,

The growth of the FIA World Endurance Championship over the last couple of seasons, particularly since the introduction of the Hypercar class, has been truly remarkable.

The championship is in a strong position, enjoying the presence of some of the world's most iconic automotive brands. It also features a sustainable and consistent calendar comprising world-class circuits across the globe, with the 24 Hours of Le Mans as the focal point. This year, we will see Aston Martin stepping up to the Hypercar class and Mercedes-AMG joining the GT ranks, while the likes of Genesis and Ford are committed to further bolstering the top class in the years to come.

This success is the result of a well-thought-out regulatory approach, and a long-term vision developed through a productive collaboration between the FIA, the ACO and the series promoter.

The Hypercar class is now in its fifth year. Last year marked the first season of a revamped class structure and the arrival of GT3 cars to the championship.

Since its inception nearly two decades ago, GT3 has become one of the most successful customer racing platforms worldwide. Its inclusion in the world's premier endurance racing series was a major milestone, opening the grid to a variety of GT cars previously unseen in the WEC.

I also want to acknowledge the diversity and inclusivity of the WEC. The number of countries represented on the entry list each year is growing. At the same time, the series has a history of female competitors' success, and we will hopefully see more of that this season.

MOHAMMED BEN SULAYEM

FIA PRESIDENT

Endurance – hitting the heights yet again!

Season after season, the World Endurance Championship is making its mark as the most spectacular and demanding of all international motorsport series. The upward trajectory is set to continue in 2026 thanks to the exceptionally high level of competition and the growing appeal of the sport.

No fewer than 14 manufacturers are poised for battle in the WEC's two classes. This number alone says how much endurance is alive and kicking! The introduction of Genesis signals a new landmark in the championship's history while other brands rubberstamp their commitment to top-level racing. Few series anywhere in the world boast such a diverse array of constructors on the same racetrack.

This competition, with its unique blend of loyal participants and permanent renewal, is a testimony to the faith placed in our sporting and technological model by the automotive industry.

Once again, the forthcoming season will take us on a worldwide journey to eight venues across four continents. From the intense excitement of Imola to the majestic setting of Spa-Francorchamps, from the exacting demands of Fuji to the sparkling jewel in the crown, the 24 Hours of Le Mans, each event embodies a different facet of endurance. The year's showpiece occasion, the 94th 24 Hours of Le Mans promises a line-up that is likely to be one of the most competitive ever seen at the legendary circuit.

The increased commitment of manufacturers, the outstanding quality of the grids and the growing enthusiasm of the public are all proof that these are remarkable times for the WEC. We are about to embark on a fascinating new chapter in 2026, one that we are proud to write with everyone involved in the championship.

Here's to an unforgettably exciting and spectacular season!

PIERRE FILLON

PRESIDENT OF THE AUTOMOBILE
CLUB DE L'OUEST

WELCOME

Dear Friends,

I am delighted to welcome you to the 2026 FIA World Endurance Championship season, which promises to be another landmark year for our sport.

With 14 manufacturers represented across the Hypercar and LMGT3 classes, the WEC continues to stand as one of the strongest and most compelling motor sport championships in the world. This level of participation reflects not only the appeal of endurance racing but also the success of the FIA's and ACO's joint regulatory approach in creating a competitive, sustainable, and globally relevant platform.

Motor sport is, by nature, a cyclical business. Manufacturers come and go, and that rhythm is part of a healthy and evolving ecosystem. Yet the arrival of Genesis, combined with consistently strong grids across both classes, is clear proof that the championship is thriving and continues to attract some of the biggest and most prestigious names in the automotive industry.

LMGT3 continues to deliver exceptional diversity of machinery and close competition, while the Hypercar class remains the pinnacle of endurance racing, showcasing cutting-edge technology and world-class performance.

The global nature of the entry list highlights the WEC's international reach, and the series continues to provide an environment where talent can flourish regardless of background.

I would like to wish all teams, drivers, partners, and officials a successful and safe season, and all fans an unforgettable year of endurance racing!

RICHARD MILLE

**FIA ENDURANCE
COMMISSION PRESIDENT**

The Italian marque has clearly thrown down the gauntlet to its rivals, who have been busy over the winter in their efforts to fight back, with multiple title-holder Toyota unveiling a heavily-updated car in its bid to turn the tables.

Cadillac was a breakthrough first-time winner in Brazil last year, and Alpine reached the top step in FIA WEC's 100th race at Fuji – a milestone moment in the world championship's illustrious history. BMW and Peugeot similarly produced podium performances, while Aston Martin's striking new Valkyrie demonstrated impressive progress and will undoubtedly be one to watch in 2026.

Genesis is a welcome newcomer to the Hypercar category this season. A comprehensive preparation programme and the presence within its driver line-up of two-time world champion André Lotterer proves that Hyundai's premium brand means serious business.

In LMGT3, meanwhile, teams fielding Aston Martin, BMW, Corvette, Ferrari, Ford, Lexus, McLaren and Mercedes-AMG machinery will all be doubly determined to get the better of class benchmark Manthey – the German outfit has claimed both titles to-date with its pair of Porsches.

We are particularly proud of the opportunities offered by FIA WEC for 'gentlemen drivers' to shine on the global stage, with every LMGT3 crew obliged to include a Bronze-rated participant – enthusiastic and extremely skilled amateurs who are in many ways the lifeblood of our sport.

Competitors will do battle around eight iconic circuits across five global territories. Following the curtain-raising contest here at Imola, the field will call into fellow classic European tracks Spa-Francorchamps and Le Mans prior to heading overseas. Races in Brazil, the USA, Japan and Qatar will subsequently build up to the season finale in Bahrain, where the 2026 champions will be celebrated. We hope you enjoy!

FRÉDÉRIC LEQUIEN

**FIA WEC
CEO**

The FIA World Endurance Championship continues to go from strength-to-strength, with the series' 14th season appropriately enough featuring 14 major automotive manufacturers, some of whom have been represented on the grid since day one.

In front of record attendances, the 2025 campaign was a real rollercoaster ride. Ferrari followed up its recent victories in the legendary 24 Hours of Le Mans by clinching the world championship crown in the headlining Hypercar division – its first top-tier endurance racing success since 1972.

WHAT YOU NEED TO KNOW TO UNDERSTAND FIA WEC IN 2026

2026 marks the 14th consecutive campaign for the FIA World Endurance Championship with, appropriately enough, 14 major automotive marques primed to battle it out for glory – an unrivalled grid in the sport!

Competitors will lock horns at eight renowned circuits from Lusail to Le Mans and Brazil to Bahrain, with speed, strategy and skill set to decide the destiny of the coveted championship crowns.

Below is a rundown of the key topics in the world's premier endurance racing series for the season ahead...

HYPERCAR CLASS

Ferrari proved to be an unstoppable force in its third campaign in FIA WEC's top-tier in 2025, wrapping up the Manufacturers' and Drivers' World Championship trophies as well as the FIA World Cup for Hypercar Teams.

Since then, however, the opposition has been pulling out all the stops to rein the Prancing Horse back in. Multiple title-holder Toyota is aiming to come out all guns blazing with its heavily-updated TR010 HYBRID, while there are six other Hypercar marques all similarly fired-up to reach the top step of the rostrum.

Cadillac was a first-time winner last year, with BMW, Peugeot and Alpine all ascending the podium too – the latter in FIA WEC's milestone 100th race in Japan – as Aston Martin took giant leaps forward with its striking new Valkyrie.

And then, of course, there is the intriguing arrival in 2026 of Hyundai premium brand, Genesis, which has left no stone unturned in its assiduous preparations for its forthcoming debut...

LMGT3 CLASS

Much like in Hypercar – where no fewer than seven different crews won a race in 2025 – the hunt for honours was fiercely-contested in LMGT3, with Corvette, Ferrari, Lexus, McLaren and Porsche each enjoying their moments in the sun while Aston Martin, BMW, Ford and Mercedes-AMG celebrated at least one podium finish apiece.

All nine brands are back for more in 2026, when Porsche specialist Manthey will be bidding to complete a hat-trick of title triumphs in the category, as the German outfit's rivals dig deeper than ever to turn the tables...

CALENDAR

The 2026 FIA WEC schedule mirrors that of recent years, featuring eight races of varying duration across five global regions.

The Qatar 1812km kicks proceedings off in March, ahead of a three-round European leg comprising Imola, Spa-Francorchamps and the legendary 24 Hours of Le Mans, the season's showpiece event in June.

The second half of the campaign begins with an American flavour, as Brazil's historic Interlagos circuit and COTA in Texas put competitors relentlessly through their paces. The championship subsequently heads east for the 6 Hours of Fuji, prior to a high-stakes, eight-hour title-deciding finale in November in Bahrain.

QUALIFYING

Introduced in 2024, the qualifying format is split into separate blocks for Hypercar and LMGT3 contenders. Following a 12-minute initial session, the fastest ten competitors in each class advance to a ten-minute 'Hyperpole' shootout to determine the leading positions on the starting grid, with pole position carrying an additional championship point.

SAFETY CAR PROCEDURE

Similarly new in 2024, the Race Director can declare a Virtual Safety Car (VSC) period if deemed necessary. Each VSC period is systematically followed by a Safety Car procedure.

The VSC is a tool intended to secure interventions around the track in the event of an incident and can be used for approximately two laps before deployment of the Safety Car (SC).

Once 'VSC' is displayed on the monitors, all cars must slow to 80km/h, in a single line, and maintain the distance separating them from the car in front and behind. Access to the pit-lane remains open throughout the VSC. When the Race Director judges it appropriate, the VSC procedure is terminated by deploying the Safety Car.

HYPERCAR

WEIGHT

1,030 KG

MAXIMUM SPEED

330 KMH

OFFICIAL TYRE SUPPLIER

The Hypercar class is the top-tier in the FIA World Endurance Championship, pitting cutting-edge, purpose-built racing prototypes piloted by professional drivers against each other in a sensational spectacle of sporting prowess.

The regulations are focused on controlling performance, allowing participants to choose cost-effective solutions since significant expenditure does not necessarily lead to performance gains – a strategy that ensures equality of opportunity across the grid.

Ferrari proved to be an unstoppable force in its third campaign at FIA WEC's highest level in 2025, wrapping up both the Manufacturers' and Drivers' World Championship laurels.

Since then, however, the opposition has been pulling out all the stops to rein the Prancing Horse back in. Multiple title-holder Toyota is aiming to come out all guns blazing with a heavily-updated car, while Alpine, Aston Martin, BMW, Cadillac and Peugeot are all similarly fired-up to reach the top step of the rostrum in the 17-strong Hypercar field. There is also an intriguing new addition in the shape of Hyundai premium brand, Genesis, with double world champion André Lotterer on the driving front.

OFFICIAL TYRE SUPPLIER

GOODYEAR

Replacing the long-standing LMGTE regulations, LMGT3 joined the FIA World Endurance Championship package in 2024 and proved to be an immediate success.

Based around the FIA's global GT3 technical platform, the spotlight is on private teams and Pro-Am line-ups, represented inside the cockpit by a blend of emerging young talents and gentlemen drivers. The cars – race-tuned versions of recognisable road-going models – feature a number of FIA WEC-specific adaptations such as digital display panels, and are all equipped with Goodyear tyres.

Much like in Hypercar – where no fewer than seven different crews won a race in 2025 – the hunt for honours was fiercely-contested in LMGT3 last year, with the spoils of victory shared between Corvette, Ferrari, Lexus, McLaren and Porsche while Aston Martin, BMW, Ford and Mercedes-AMG celebrated at least one podium finish apiece.

All nine brands – fielding two cars each – are back for more in 2026, when Porsche specialist Manthey will be bidding to complete a hat-trick of title triumphs in the category, as the German outfit's rivals dig deeper than ever to turn the tables...

SUSTAINABILITY

Through FIA WEC's Sporting and Technical Regulations, the FIA and the Automobile Club de l'Ouest (ACO) encourage manufacturers and teams to develop future energy solutions such as biofuels, bio-methane, hydrogen and zero-emissions technologies. This long-term innovation dynamic has delivered measurable results: while it took 40 years (1960–2000) to reduce fuel consumption at the 24 Hours of Le Mans by 50%, the same level of efficiency was achieved again in just six years, between 2010 and 2016, highlighting the acceleration of technological progress and strategic approach.

In 2025, the FIA World Endurance Championship achieved the highest level of FIA environmental recognition, the FIA 3-Star Environmental Accreditation, and obtained ISO 20121 certification for responsible event management.

FIA 3-Star represents the highest level of sustainability recognition awarded by the FIA, while ISO 20121 is an international standard for responsible management.

Our CSR strategy is built on four pillars: supporting host communities, reducing internal emissions, stakeholder-driven governance, and responsible leadership with sustainable and transparent practices.

MICHELIN DESIGNS A NEW TYRE FOR THE HYPERCAR CATEGORY

Technical partner of the FIA WEC championship since its creation in 2012, Michelin was selected by the FIA and the ACO to supply tyres for the premier Hypercar category starting in 2021. For Michelin, Endurance racing is the ideal platform to demonstrate the longlasting performance of its tyres and to develop more sustainable products aligned with the Michelin Group's 2050 strategy.

The new MICHELIN Pilot Sport Endurance tyres equipping Hypercars from the 2026 season onward have been designed using 50% renewable and recycled materials. Beneath their avantgarde design lies even greater performance delivered to Michelin's partners.

The FIA WEC championship strengthens the ties between Michelin and the world's leading automotive manufacturers, helping accelerate the transfer of Michelin's innovations from track to road.

GOODYEAR READY FOR ITS BIGGEST SEASON EVER

Goodyear played a defining role in the 2025 season, the sophomore year of the LMGT3 category. As the exclusive tire supplier for LMGT3, Goodyear focused its development on delivering the optimal balance between durability and performance across an intensely competitive grid and constantly evolving race conditions.

The competitiveness of the LMGT3 class was evident throughout the season, with five different teams claiming victories. The jewel in the crown came at the legendary 24 Hours of Le Mans, where LMGT3 cars reached peak performance levels thanks to a Goodyear tire engineered to meet the extreme demands of the event. Several drivers completed up to four consecutive stints on a single Goodyear compound, a clear demonstration of outstanding durability and consistency in a truly memorable season. Goodyear Eagle tires' longevity consistently exceeded drivers' maximum drive-time limits, highlighting a significant technological achievement and reinforcing LMGT3 as the next chapter in Goodyear's storied legacy in international endurance racing. But tire longevity did not come at the expense of performance: the winning LMGT3 car completed a record-breaking 341 laps for the category, clearly demonstrating that increased durability delivered no performance trade-off. Meanwhile, a full grid of 17 LMP2 cars—also exclusively fitted with Goodyear tires—made their sole 2025 WEC appearance at Le Mans, further enhancing the spectacle of motorsport's most iconic endurance race. Out of 62 starters, 41 cars competed on Goodyear tires.

At season's end, the triumphant trio of Richard Lietz, Riccardo Pera and Ryan Hardwick etched their names into the history books, securing a second consecutive LMGT3 championship title for Manthey 1st Phorm.

2026: CONSISTENCY IS KEY

The 2026 season will see Goodyear supporting a confirmed lineup of nine manufacturers in the LMGT3 class. Aston Martin, BMW, Corvette, Ferrari, Ford, Lexus, McLaren, Mercedes-AMG and Porsche all return to the grid.

At the 24 Hours of Le Mans, LMP2 will rejoin the WEC field, with Goodyear fully prepared to support the class as the exclusive tire supplier in one of the most anticipated endurance races of the year. Goodyear will also continue its role as the exclusive supplier for ELMS. Across all WEC rounds, teams will run Goodyear's proven Eagle Medium (B) compound

alongside the wet tire, ensuring optimal performance in all conditions. Once again in 2026, the Eagle Medium has demonstrated its versatility and consistency across every circuit, particularly at Le Mans, where teams were able to complete up to four driving stints on the same set of tires—equivalent to as many as 44 laps or 600 km, twice the distance of a Formula 1 Grand Prix. Even with the introduction of new tire allocation regulations, Goodyear expects tire management to remain a key strategic factor. The Eagle Medium's long-distance reliability and the LMGT3 class's focus on minimising pit-stop time continue to reward smart strategy. With additional tire sets available per round, will teams still opt to extend stints on a single set? The answer may once again define race outcomes.

With front-, mid- and rear-engined cars competing in the same category, balance is critical. No single configuration should enjoy a structural advantage, and Goodyear's tires play a central role in ensuring a fair and competitive platform. Continuous data analysis and trackside evaluation will remain essential throughout the season, as Goodyear pushes forward with ongoing innovation to deliver ever more efficient and high-performing specifications. As always, Goodyear's work on track continues to shape the Goodyear Eagle ultra-high-performance road tire range. With LMGT3 cars closely reflecting their road-going counterparts, technology developed in endurance racing continues to drive progress both on and off the circuit.

GOODYEAR WINGFOOT AWARD: FANS TAKE THE WHEEL

The Goodyear Wingfoot Award returns in 2026, once again placing fans at the heart of the action. Votes from trackside spectators and viewers at home will determine the winner at each race, celebrating the standout performance of the day. This fan-driven "Driver of the Day" format has strengthened engagement across the championship, highlighting the diverse skills and racing styles that define endurance competition at the highest level. In 2026, eight different drivers claimed the Wingfoot Award, reflecting the depth of talent on the grid and engaging thousands of fans around the world.

More competition. More innovation. Better fan engagement.
The 2026 season is here and Goodyear is setting the pace.

Built in 1953 and named after Ferrari's founder and his first-born son, Italy's Autodromo Internazionale Enzo e Dino Ferrari was initially associated with two-wheeled motorsport, hosting top-flight motorcycle grands prix on multiple occasions between 1969 and 1999. The FIA Grade 1 venue simultaneously staged Formula 1's San Marino Grand Prix every year from 1981 to 2006, with the race returning as the Emilia Romagna Grand Prix in 2020.

The track similarly has a proud history in endurance racing. In 1965, 1974 and 1984, the Autodromo was the scene of a round of the FIA World Sportscar Championship, while the 6 Hours of Imola was contested in both the Le Mans Series and Intercontinental Le Mans Cup – precursor to the FIA World Endurance Championship – in 2011.

Imola was visited by the European Le Mans Series from 2013 to 2016, rejoining the calendar in 2022 before welcoming FIA WEC for the first time in 2024, when locally-based Ferrari thrilled the tifosi by claiming a top three lockout in qualifying. The Prancing Horse popularly reached the top step of the rostrum on home soil 12 months later.

One of the few major international circuits to run in an anti-clockwise direction and characterised by a unique 'old-school' feel, its 4.909km layout sees Hypercar drivers hit top speeds in the region of 312km/h and travel with a fully open throttle for 50% of the lap.

9 MAY, 2026

One of motorsport's most iconic venues, the Circuit de Spa-Francorchamps – nestled deep in Belgium's Ardennes forest, making it famous for its unpredictable weather – held its first car race in 1922, using fast public roads. Two years later, the maiden edition of the Spa 24 Hours took place, going on to form part of the inaugural FIA World Sportscar Championship campaign in 1953.

Similarly a fixture on the first FIA Formula 1 World Championship calendar in 1950, the track was subsequently shortened in 1979, turning it into a permanent circuit that has hosted F1 on all but two occasions over the past four decades.

After welcoming the Sports Racing World Cup, FIA Sportscar Championship, Le Mans Series and Intercontinental Le Mans Cup, Spa has been a staple on the FIA World Endurance Championship schedule since the series' inception in 2012.

A firm favourite amongst drivers and fans, its undulating, technical and demanding 7.004km layout invariably generates exciting and spectacular action, with the sight of a full field thundering into Eau Rouge never to be forgotten. During each tour, Hypercar drivers shift gears 44 times, reach top speeds of approximately 315km/h and travel with a fully open throttle for 58% of the lap.

The 2024 running of the 6 Hours of Spa went down in the history books, as Hertz Team JOTA became the first independent outfit to win a race outright in FIA WEC's Hypercar era.

13-14 JUNE, 2026

Widely regarded as one-third of international motorsport's 'Triple Crown' – alongside Formula 1's Monaco Grand Prix and the Indianapolis 500 in the United States – the 24 Hours of Le Mans is the undisputed centrepiece of the FIA World Endurance Championship schedule.

First run in 1923 by the Automobile Club de l'Ouest, the race – the longest and most challenging on the FIA WEC calendar – has attained legendary status, delivering happiness and heartbreak in equal measure.

With Hypercars reaching eye-watering speeds of 340km/h around the 13.626km Circuit de la Sarthe – made up of closed public roads and dedicated racetrack sections – and an estimated 78 gearshifts per lap, 70% of which is spent at full throttle, every component of the car is subjected to immense stress, and the slightest lapse in concentration instantly punished.

In recent years, the race has become something of a 24-hour sprint, so fiercely intense is the competition in the FIA WEC Hypercar field. In front of record-breaking on-site attendances and TV audiences, the latest two editions have seen a winning margin of just 14 seconds, with no fewer than nine cars still on the lead lap in 2024 when the chequered flag fell.

Not only that, but as a double-scoring round with 50 points on offer for the triumphant crew in both the Hypercar and LMGT3 categories, Le Mans often proves pivotal in the chase for world championship glory...

10 RACING SPIRIT OF LÉMAN

12 JULY, 2026

Inaugurated in 1940, Interlagos is Brazil's premier motorsport venue, with its flowing layout inspired by circuits such as Roosevelt Raceway in the USA, Brooklands in England and Monthéry in France. Its name – reflective of its geographical location in the southern suburbs of the country's capital, São Paulo – means 'between lakes'.

Hosting its first Formula 1 race in 1973, the track was rebaptised the Autódromo José Carlos Pace in 1985, in honour of the South American nation's late racing driver. Since 1990, it has been the exclusive home of the Brazilian Grand Prix (now known as the São Paulo Grand Prix). In 2010, Interlagos welcomed the FIA GT1 World Championship, before featuring on the FIA World Endurance Championship calendar in the series' first three campaigns from 2012 to 2014.

Rejoining the schedule following a ten-year absence, the 2024 edition of the 6 Hours of São Paulo drew a trackside crowd of more than 73,000 enthusiastic fans, who enjoyed an exhilarating spectacle of top-flight sportscar competition. They returned en masse 12 months later, witnessing breakthrough victories for Cadillac in Hypercar and Lexus in LMGT3, and celebrating a hugely popular podium finish for home hero Eduardo 'Dudu' Barrichello...

At just 4.309km, anti-clockwise Interlagos is the shortest circuit of the season. Hypercars reach speeds in the region of 305km/h, with approximately half of the lap spent at full throttle. Its gradient changes make it particularly demanding for drivers, while the long pit straight and 'Reta Oposta' back straight invariably generate plenty of overtaking action.

6 SEPTEMBER, 2026

Designed with the input of former motorcycling world champion Kevin Schwantz and built to bring Formula 1 back to the US, the Circuit of The Americas (COTA) staged its first race – the United States Grand Prix – in 2012, going on to welcome the FIA World Endurance Championship ten months later with the inaugural edition of the Lone Star Le Mans. The track similarly plays host to the IMSA WeatherTech SportsCar Championship, MotoGP and NASCAR.

Nestled in the heart of Texas, COTA is renowned for its state-of-the-art facilities and challenging layout, rapidly establishing itself as a favourite amongst drivers and fans alike due to its dramatic elevation changes, sweeping high-speed corners, slow technical sections, notorious bumps, a signature uphill run into Turn 1 – known as 'Big Red' – and the triple-apex right-hander that forms Turns 16, 17 and 18.

The most modern venue on the FIA WEC calendar, COTA invariably generates memorable action, with the local weather also capable of playing its part. Following a four-year hiatus, the track returned to the series' schedule in 2024, when a 1.780s margin of outright victory was the second-closest in history.

Run in an anti-clockwise direction and extremely hard on both brakes and tyres, approximately 44% of the 5.513km lap is spent at full throttle, with Hypercars reaching speeds in the region of 305km/h. The prime overtaking spots are Turns 1 and 12, and during each tour, drivers shift gears an estimated 54 times.

27 SEPTEMBER, 2026

Spectacularly located in the foothills of Japan's highest peak, Mount Fuji – from which it takes its name – Fuji Speedway was originally conceived as a fully-banked superspeedway with the intention of hosting NASCAR-style races, but insufficient funding meant the project could not be completed.

The circuit was subsequently converted into a road course that brought Formula 1 to Asia for the first time in 1976, when James Hunt dramatically pipped Niki Lauda to world championship glory in a famous end-of-season showdown. The track fell off the F1 calendar after 1977, but returned for a further two-year stint three decades later.

In the meantime, super-fast Fuji welcomed the FIA World Sportscar Championship from 1982 to 1988, prior to featuring on the inaugural FIA World Endurance Championship schedule in 2012. Japanese carmaker Toyota – owner of the venue since 2000 – has prevailed in nine of the 12 rounds there to-date, to the delight of the tens of thousands of passionate home fans who regularly turn out in support.

Despite being the second-shortest lap of the FIA WEC campaign, its 1.475km main straight is one of the longest in the sport, enabling drivers to fully exploit the potential of their cars and hit top speeds in excess of 330km/h. The 2025 edition of the 6 Hours of Fuji – won by Alpine – marked the 100th race in the series' history.

24 OCTOBER, 2026

Built in under a year, Lusail International Circuit (LIC) – a state-of-the-art, world-class FIA Grade 1 and FIM Grade A venue, located 30km north of the Qatari capital, Doha – opened in 2004, when it welcomed its first event, the Qatar Motorcycle Grand Prix.

The track has staged the only Middle Eastern round of the MotoGP World Championship ever since – won on four occasions by Valentino Rossi, who went on to compete in the FIA World Endurance Championship in 2024 and 2025.

In 2007, permanent outdoor lighting was installed to enable LIC to host night races and steadily grow its portfolio of major international motorsport events, subsequently receiving visits from World Superbikes and the FIA World Touring Car Championship.

In 2021, Formula 1 debuted in Lusail, and in 2024, the Qatar 1812km – named in honour of the country's national day – staged the FIA WEC 'Prologue' pre-season test and curtain-raising contest for the first time, in an agreement due to continue until at least 2029.

Surrounded by desert, LIC's smooth, high-speed 5.419km layout poses a number of unique challenges, and pushes drivers, cars and tyres right to the limit as they race from day into night...

7 NOVEMBER, 2026

As has become tradition in the FIA World Endurance Championship, the 2026 campaign will conclude in Bahrain, where champions will be crowned.

Home to the Middle East region's maiden grand prix, since opening in 2004, Bahrain International Circuit (BIC) has hosted Formula 1 on an almost annual basis. In 2007, it became the first F1 circuit to receive the prestigious 'FIA Institute Centre of Excellence Award', in recognition of the safety and quality of its infrastructure.

BIC similarly featured on the inaugural FIA WEC calendar in 2012, and has welcomed the series no fewer than 14 times to-date – with Toyota triumphing on 11 of those occasions. The ultra-successful Japanese marque remains undefeated there since 2017, banishing the prospect of a rare winless season in 2025 courtesy of a commanding one-two finish.

Its demanding 5.412km layout asks a lot of drivers and cars, with up to 54 gear changes per lap and top speeds approaching 300km/h down the four long straights. As much as 60% of the lap is spent at full throttle, with its wide nature encouraging audacious overtaking manoeuvres. Careful preservation of tyres and brakes can often be the key to success.
